Education

Chulalongkorn University, Computer Science
Bachelor of Science – Computer Science Major

2017 – Present
(Expected: May 2021)

Work Experience

Software Engineer, Frontend (Intern) at Wongnai Media Co., Ltd.

Jun 2020 – Jul 2020

Internship at Wongnai, Yelp equivalent, largest restaurant reviews platform in Thailand.

Key responsibilities:

- **Wongnai Rewards** – Upgraded interfaces and functionality of a module that allows users to discover, redeem, and track rewards. Implemented using React and TypeScript. Operated unit testing using Jest; resulting in improved overall UX and performance.
- **User Dropdown Menu** – Implemented an all-new navigation menu (desktop and mobile), and migrated to the central repository; resulting in reduced 60% code redundancy in several projects (Wongnai, Wongnai Beauty, Delivery, and Massage at Home).

Web Developer and UX/UI Designer (Part-time) at Socity Space Co., Ltd.

May 2019 – Present

Recruited by a full-service digital agency in Thailand, THB 1 million in valuation.

Key responsibilities:

- **Web Development and UX/UI Design** – Design and develop websites using WordPress, including installation, configuration, and creation of custom templates and plugins. Worked closely with clients to collect requirements and ensure project quality.
- **Art Direction and Graphic Design** – Collaborate with clients to develop corporate identity materials and artwork for marketing initiatives. Conceived original designs and marketing concepts used in brochures, flyers, and online ads.

Selected case experiences:

- **COTTO** – *Siam Sanitary Ware Industry Co., Ltd., Leading tiles and sanitary ware manufacturing company in Thailand.* Designed and developed website optimized for digital signage, displayed in the ACT Forum exhibition (25k visitors); resulting in improved brand awareness. Worked successfully under a tight target deadline (1 week) and achieved positive feedback.

Undergraduate Projects

- **Senior Project: OCSC Learning Platform (2021)** – An e-learning system (250k users) for the Office of the Civil Service Commission (OCSC). Responsible for frontend development and UX design. Developed by using TypeScript, React, Redux, Material-UI, .NET Core, and MariaDB.
- **ConFusion Restaurant Website and Mobile App (2020)** – A full-stack informational website and mobile app. Developed by using React, React Native, Bootstrap, NodeJS, and MongoDB. Implemented user authentication, customer reviews, and Firebase integration.
- **Cookify Recipes Search Engine (2020)** – A recipes search tool and shopping list web app. Developed by using HTML, (S)CSS, JavaScript (ES6), and Forkify API. Implemented with the applied concept of model-view-controller and prototype-based programming.
- **CU Pop+ Shuttle Bus Queueing App (2019)** – A design thinking term project. Collaborated with a team of 7 people to performed ideation, brainstorming, and wireframing. Created numerous mobile app prototypes of varying fidelity to test assumptions and concepts.
- **Decibel Airlines Reservation System (2018)** – A desktop application to manage flights reservation. Developed by using Java and object-oriented programming techniques.
